Hy-dro-gen

Hyphenation patterns from github:typst/hypher

#import "@preview/hy-dro-gen:0.1.0" as hy

<pre>#hy.exists("en")</pre>	true	
<pre>#hy.exists("xz")</pre>	false	
<pre>#hy.syllables("hydrogen")</pre>	("hy", "dro", "gen")	
<pre>#hy.syllables("hydrogène")</pre>	("hy", "drogène")	
<pre>#hy.syllables("hydrogène", lang: "fr")</pre>	("hy", "dro", "gène")	
#hy.syllables("υδρογόνο", lang: "el")	("υ", "δρο", "γό", "νο")	
#hy.syllables("hydrogène", lang: "xz") panic: Invalid language		
<pre>#hy.syllables("hydrogène", lang: "xz", fallback: auto)</pre>	("hydrogène",)	
#hy.syllables("hydrogène", lang: "xz", fallback: "fr") ("hy", "dro", "gène")		

The following languages are supported:

Code	Language	Code	Language
"af"	Afrikaans	"sq"	Albanian
"be"	Belarusian	"bg"	Bulgarian
"ca"	Catalan	"hr"	Croatian
"cs"	Czech	"da"	Danish
"nl"	Dutch	"en"	English
"et"	Estonian	"fi"	Finnish
"fr"	French	"ka"	Georgian
"de"	German	"el"	Greek
"hu"	Hungarian	"is"	Icelandic
"it"	Italian	"ku"	Kurmanji
"la"	Latin	"lt"	Lithuanian
"mn"	Mongolian	"no"	Norwegian
"nb"	Norwegian	"nn"	Norwegian
"pl"	Polish	"pt"	Portuguese
"ru"	Russian	"sr"	Serbian
"sk"	Slovak	"sl"	Slovenian
"es"	Spanish	"sv"	Swedish
"tr"	Turkish	"tk"	Turkmen
"uk"	Ukrainian		

The above mapping is available via the static dictionary #hy.languages.

- exists()
- syllables()

Variables

languages

exists

Check if a code corresponds to a language that has registered patterns.

See the list of officially supported languages at github:typst/hypher

If this function returns true, then an invocation of syllables with this language is guaranteed to not raise a "Invalid language" failure.

Parameters

```
lang str
2-letter language code.
```

syllables

Splits a word into syllables according to hyphenation patterns.

Parameters

```
syllables(
  word: string,
  lang: str,
  fallback: str auto none
) -> (..string,)
```

```
word string
```

Word to split.

```
lang str
```

Language 2-letter code.

Default: "en"

```
fallback str or auto or none
```

Determines the behavior in case lang is unsupported

- none: panics with "Invalid language"
- auto: the word is not split at all
- valid 2-letter code: use that instead

Default: none

languages dictionary

Dictionary of supported codes and languages, in the format:

```
(en: "English", fr: "French", ...)
```

This dictionary is expected but not guaranteed to be in sync with exists, because they are fetched through different means. (exists queries the actual WASM module, while languages is generated automatically from the source code of hypher). If they are out of sync, exists is the authority for which languages are actually supported by syllables.
